

ARTICLE 503.16 CONCRETE SUPERSTRUCTURES (LCDOT)

Effective: June 1, 2007

Revised: March 3, 2016

Description: This work shall consist of constructing cast-in-place concrete bridge decks, slab bridges or other monolithic superstructures.

General: The work shall be performed according to Article 503.16 of the “Standard Specifications” and the following:

A finishing machine is not required. After the concrete is placed and compacted, it shall be struck off with a vibrating screed as specified in Article 503.16 (a)(1), third paragraph. The top surface of the concrete deck shall be given a brush finish according to Article 424.06 of the “Standard Specifications”.

Method of Measurement: This work will be measured for payment in place and the volume computed in cubic yards.

Basis of Payment: This work will be paid for at the contract unit price per cubic yard for CONCRETE STRUCTURES and CONCRETE SUPERSTRUCTURE. *The unit price shall include all equipment, materials and labor required to construct the concrete structure(s) or superstructure(s).*
