

SECTION 482 HOT-MIX ASPHALT SHOULDERS (LCDOT)

Effective: January 1, 2007

Revised: May 20, 2014

Description: This work shall consist of constructing a hot-mix asphalt (HMA) shoulder on a prepared subgrade, existing paved shoulder, or subbase.

General: The work shall be performed according to Section 482 of the “Standard Specifications” and the following:

Add the following to Article 482.04:

When the HMA shoulder is constructed on the existing aggregate shoulder, the aggregate shoulder shall be graded and then rolled with a steel wheeled roller prior to placing the Hot-Mix Asphalt Shoulder. The steel wheel roller shall meet the requirements of Article 312.04 and Article 1101.01(e) of the “Standard Specifications”.

Basis of Payment: This work will be paid for according to Article 482.08 of the “Standard Specifications”. *The unit price shall include all equipment, materials and labor required to construct the HMA shoulders. Grading and rolling the existing aggregate shoulder shall be included in the unit price and no additional compensation will be allowed.*
