

X2020110 GRADING AND SHAPING SHOULDERS (LCDOT) For use on LCDOT let projects only - do not include in IDOT let projects. Delete this note from the Contract Specifications.

Effective: January 1, 2007
Revised: May 20, 2014

Description: This work shall consist of grading the existing shoulder material to match the proposed pavement elevation.

General: The work shall be performed according to Section 202 of the "Standard Specifications" and the following:

There are no definite locations for this pay item, but the work may occur at butt joints and side roads. The work shall be performed at locations designated by the Engineer.

Method of Measurement: This work will be measured in place, in units (one unit equals 100 linear feet) according to Article 202.07 (b) of the "Standard Specifications", of the actual shoulders graded and shaped.

An estimated length (units) has been shown in the Summary of Quantities to establish a unit price only.

Basis of Payment: This work will be paid for at the contract unit price per unit for GRADING AND SHAPING SHOULDERS.

GRADING AND SHAPING SHOULDERS does not include removal of bituminous or concrete, entrance or side road, pavement. If the Engineer determines that a portion of an existing entrance or side road requires removal before placement of the shoulder, this work shall be paid for according to Article 109.04 of the "Standard Specifications".
