

X2511630 EROSION CONTROL BLANKET (SPECIAL) (LCDOT) For use on LCDOT projects with landscape slopes 2:1 or steeper. For slopes less than 2:1 use 25100630 Erosion Control Blanket. Delete this note from the Contract Specifications.

Effective: January 1, 2007

Revised: September 4, 2018

Description: This work shall consist of furnishing and placing erosion control blanket over seeded areas on slopes 2:1 or steeper.

Materials: The erosion control blanket shall meet the requirements of Article 1081.10 of the "Standard Specifications", except that:

The blanket material shall be limited to 100% biodegradable coconut fiber erosion control blanket with natural fiber netting.

General: The work shall be performed according to Article 251.04 of the "Standard Specifications", and the following:

The blanket shall be applied perpendicular (vertical) to the slope (contours) i.e. lengthwise down the slope (top to bottom) – not parallel (horizontal) to the slope (contours). The upslope edge shall be toed in and the adjacent blanket shingled or overlapped in the direction of the flow.

Method of Measurement: This work will be measured for payment in place in square yards of actual area covered.

Basis of Payment: This work will be paid for at the contract unit price per square yard for EROSION CONTROL BLANKET (SPECIAL). *The unit price shall include all equipment, materials and labor required to furnish and place the erosion control blanket.*
