WATER SAMPLE KIT PARTICIPANTS

The water sample test kits from these participating locations are only used for water well testing. Please call to determine hours of operation. The standard bacterial analysis includes the following; total coliform, E.coli and nitrate screen. The water sample test kits provided to you cannot be used to collect water samples from community water systems due to the presence of chlorine. For other drinking water, surface water and wastewater testing please call 847-377-8020 for further information.
