

# CONSTRUCTION and DEMOLITION DEBRIS RECYCLING PROGRAM

Lake County requires 75% of construction and demolition debris to be diverted from landfills for all new construction, renovation, demolition, entire re-roofing, or entire re-siding projects of 1,500 square feet or greater gross floor area, in unincorporated Lake County.

## For all re-roofing and re-siding projects, there are two steps to construction debris recycling:

1. Sign and notarize the re-roofing or re-siding registration form or permit application.

2. Have the construction debris hauled to a facility that recycles, meeting the 75% diversion requirement.

## For all other projects of 1,500 square feet or greater gross floor area, there are four steps to construction debris recycling:

1. Sign and notarize the permit application.
2. Complete the "Construction and Demolition Debris Recycling Plan."
3. Have the construction debris hauled to a facility that recycles, and ask for receipts.
4. Submit a completed compliance report along with the receipts, **ten or more days prior to final inspection.**

The full text of the ordinance is available online at: <http://www.swalco.org/Resources/Publications/Pages/Recycling.aspx>

**IF YOU HAVE ANY QUESTIONS, PLEASE CALL THE  
LAKE COUNTY CENTRAL PERMIT FACILITY AT (847) 377-2600.**
