Instructions for the Website for using the interactive Permit Application form

Below is the interactive Watershed Development Permit Application form used in our permit process for the Lake County Watershed Development Permit.

The form listed below is designed so that users can fill in the blanks using their computer. Completed forms can then be printed, signed, and mailed to Lake County Stormwater Management. **PLEASE NOTE: To use the interactive form you must have Adobe Acrobat Reader 4.0 or newer.**

Instructions for interactive forms:

1. Choose the modifiable form by clicking on the form. Upon clicking on the form, Acrobat Reader will download the form to your computer.

2. Once the form is displayed, you may click on any of the blanks where text is usually typed. The cursor will then appear in that blank. You may now type the desired text. When the text for that blank has been completed, press the TAB key to move to the next interactive field. **NOTE: Some of the forms contain multi-line blanks. You will have to press the ENTER key to move to the next line within that multi-line grouping.**

Once all of the fields have been completed, you may print the form. **NOTE: These forms only allow for filling, saving and printing. You will be able to save the form to your computer once it is filled in. When you are finished filling the fields and printing the form, you may exit Acrobat.** *We require original signatures and the Lake County Stormwater Management will not accept any electronic Watershed Development Permit Applications.*
