Coming Soon – Lake County Public Works Water Main Interconnect Project

Dear Business Owner:

This fall, you will see crews in front of Apple Orchard Square installing an interconnection between Lake County’s Vernon Hills water system and the Village of Lincolnshire’s water system. The new interconnection is an upgrade that allows water to be transferred between systems in an emergency if either system loses water. The interconnection creates a more resilient water system and aligns with Lake County Public Works’ (LCPW) mission to provide efficient, safe and reliable water services to our customers.

The work will occur within the grass area west of the parking lot in front of the Apple Orchard Square property. Construction is expected to begin this fall and is anticipated to last approximately one month.

Business and parking impacts from this construction project should be minimal. The majority of the construction will be completed by the LCPW Maintenance Division crews. There will be visible signs of construction including excavation and storage of equipment and materials in the grass area in front of the strip mall. Driveway access to Apple Orchard Square and parking at the strip mall will be maintained throughout the project.

An interruption to your water service for the project will be necessary at one point. However, LCPW is anticipating this water service interruption will take place for one day outside of business hours to limit impacts to business operations. Also for a period of one day, crane access will be required through the parking lot to install a large concrete structure that will impact the south end of the parking lot during the early morning hours. More information and notice on when the water service interruption and concrete structure installation will take place will be provided once the work has been scheduled.

If you have questions regarding the upcoming water main work, please contact our Engineering Project Manager, Emily Karry or our Maintenance Supervisor, Juan Cisneros, at 847-377-7500 or via email at PublicWorks@lakecountyiil.gov.

Sincerely,
Lake County Department of Public Works
