

**SANITARY SEWER REHABILITATION IN THE AREA:  
INVERRARY LANE**

As a part of Lake County's Capital Improvement Program, Lake County Public Works (LCPW) will be rehabilitating 700-feet of sanitary sewer pipe north of Inverrary Lane in the green space between Mallard Drive, Mallard Lane, Pintail Lane and Pintail Court. Additional sewer pipes will be improved north of the community. LCPW will use trenchless technology to minimize the impacts of construction and restoration.

Residents may observe truck traffic and equipment noise during construction. No traffic lane closures are anticipated. Construction is expected to start in August and is anticipated to be completed this fall.

LCPW is proactive in maintaining its infrastructure. For more information on the project, visit our website at: [lakecountyil.gov/Inverrary](http://lakecountyil.gov/Inverrary)
