

**SANITARY SEWER IMPROVEMENTS TO OCCUR IN THE AREA:
LINDEN AVENUE**

As a part of Lake County's Capital Improvement Program, Lake County Public Works (LCPW) will be rehabilitating 300 feet of sanitary sewer on the west side of Linden Avenue between 34881 and 34964 Linden Lane. LCPW will use trenchless technology to minimize the impacts of construction and restoration. Work is scheduled to begin in August and is anticipated to be completed this fall.

Residents may observe truck traffic, equipment noise and daytime lane closures. Residents may be asked to limit water usage at times, but notice will be given to affected customers.

LCPW is proactive in maintaining its infrastructure. For more information on this project, visit our website at: lakecountyyil.gov/Linden
